Metadata

Add Metadata Attribute

Attribute Name (Required)

Value Set-up

Data Type

Enter the data type of the value

Select type

Default Value

This will be the default value when the template is applied

Hint Text

Enter helpful information about this metadata

Unit

☐ Required

Cancel

Add

Depending on what is chosen here will determine the input type of Value. As you select, Value input gets updated.

You can choose
String (default)
Boolean
Date
Float
Int
List

Add Metadata Attribute

Attribute Name (Required)

Value Set-up

Data Type

Enter the data type of the value

List

Data list

Type each option in the list on a separate line

Default Value

This will be the default value when the template is applied

Select value from list

Hint Text

Enter helpful information about this metadata

Unit

☐ Required

Cancel

Add

When List is selected the value will turn to a dropdown type. Value will be inactive till a list item is added. Once a list item is added the value dropdown will activate. As a user adds/edits/deletes an item the dropdown will update. Value will remain on the default "Select value ..." option till a different option is selected.

Add Metadata Attribute

Attribute Name (Required)

Value Set-up

Data Type

Enter the data type of the value

List

Data list

Type each option in the list on a separate line

MiSeq
NextSeq
NovaSeq

Default Value

This will be the default value when the template is applied

Select value from list

Hint Text

Enter helpful information about this metadata

Unit

☐ Required

Cancel

Add

Add Metadata Attribute

Attribute Name (Required)

Value Set-up

Data Type

Enter the data type of the value

Boolean

Default Value

This will be the default value when the template is applied

☐

Hint Text

Enter helpful information about this metadata

Does this experiment need lab work?

Unit

☐ Required

Cancel

Add
